

Protecting & Restoring Healthy Waterways

streamwisechamplain.org

What is Stream Wise?

Stream Wise supports streamside rural, suburban, and urban property owners in Vermont, New York, and Quebec to enhance and protect buffers - the naturally vegetated areas adjacent to streams and rivers.

Stream buffers safeguard water quality, increase flood resiliency, and form valuable wildlife habitat.

How does it work?

A local Stream Wise expert will walk your streamside land with you to provide a free, evidence-based evaluation of buffer conditions, including conservation, access, stormwater runoff, and invasive species.

We help protect and improve your waterway with our targeted recommendations and technical assistance.

Be a Stream Wise Steward!

Stream Wise awards actions by landowners that maintain effective stream buffers. **Get started with:**
